TECHNICAL SPECIFICATIONS

ENTERPRISE SYSTEM CONNECTIVITY

- Effortless integration with any enterprise platform, including custom-built & specialized systems
- Seamlessly connects with major systems like ServiceNow, Oracle, Microsoft, & SAP, along with common ERPs & IT Asset Management Platforms, for automated workflows
- Secure, reliable, & encrypted data exchange across all integrated systems for ultimate data integrity & protection
- Streamlines data flow across your enterprise infrastructure

COMPREHENSIVE REPORTING & AUDITING

- Consolidated reporting in PDF, CSV, & JSON formats
- Clear audit trails with comprehensive asset tracking
- Customizable reports with easy import / export options
- Quick search function & automatic report retrieval

IT ASSET LIFECYCLE INTEGRATION

- Integrates with IT Asset Lifecycle systems for asset lifecycle documentation
- Provides a complete audit trail from acquisition to secure disposition
- Ensures audit-ready compliance & mitigates data security risks

EASE OF USE

- Intuitive, user-friendly interface
- Quick access to all essential account functions & erasure management tools
- Automated notifications for updates & important account information

WORKFLOW AUTOMATION

- Automates certificate & report generation
- Triggers other actions in connected systems
- Allows for custom workflow configurations
- Significantly reduces manual intervention in various parts of the asset disposition process
- Improves efficiency & accelerates data sanitization processes
