Certified Automated Data Erasure

TECHNICAL SPECIFICATIONS

ENTERPRISE INTEGRATION

- Flexible integration with existing IT asset management processes
- Compatible with custom enterprise deployments
- Supports Secure Command's network capabilities for high-volume enterprise environments
- Portable USB-based solution for distributed location enrollment checks

OPERATIONAL EFFICIENCY

- Adaptable to enterprise operational scales
- Fast, automated bulk enrollment status checking
- Supports high-volume enrollment detection across multiple business units

CORE CAPABILITIES

- Enrollment pre-detection verification
- Easy re-checking of device enrollment status
- Search and filter capabilities for enrollment records
- Ability to collect enrollment information from offline devices
- Drag & drop file upload to cloud for streamlined enrollment status detection

EASE OF USE

- Quick, straightforward enrollment status detection
- Simple USB drive-based data collection
- No internet access required for initial device information gathering
- Easy searching & filtering of enrollment records by serial number
- Eliminates need for repeated device processing

KEY BENEFITS

- Prevents processing of enrolled devices
- Reduces wasted time & resources shipping enrolled devices
- Supports on-site visits & remote location processing
