Automated Erasing & Testing for
Macs & Chromebooks

Boost Efficiency & Profitability
Streamline Your Refurbishment Workflow

- Increase operational efficiency
- Enhance refurbishment quality
- Improve resale value
- Reduce labor costs & time

NIST

Compatible with all Chromebook models, MacBook (Pro, Air), Mac (Mini, Studio, Pro) & iMac with Apple Silicon (M1, M2, M3) & Intel processors (T1, T2 & Legacy).

Follows official Apple security practices with NIST 800-88 compliant erasure & supports latest ChromeOS (v128). R2v3 compliant hardware testing for all devices.

TECHNICAL SPECIFICATIONS

PATENTED TECHNOLOGY

- Automates data deletion and refurbishment
- No training or industry knowledge required
- Minimal operator interaction

R2v3 COMPLIANT HARDWARE TESTING

Automatic verification for all devices:

- Keyboard functionality
- Touchpad responsiveness
- Screen display
- Webcam operation
- Audio input and output (microphone & speakers)

DEVICE COMPATIBILITY FOR MACS

- Compatible with MacBook (Pro, Air), Mac (Mini, Studio, Pro) & iMac
- Supported CPUs: Apple Silicon (M1, M2, M3) & Intel processors (T1, T2 & Legacy)
- Follows official Apple security practices
- Automatically
 - verifies activation locks,
 - reinstalls macOS
 - collects Apple-specific system information

DEVICE COMPATIBILITY FOR CHROMEBOOKS

- Compatible with all Chromebook models
- Supports latest ChromeOS (v128)
- Automated ChromeOS processes
- Streamlined powerwash procedure

REPORTING & AUDITING

- Digitally signed, tamper-proof erasure certificates generated for each erasure
- Detailed, device-specific reporting includes:
 - device specifications,
 - test results
 - erasure verification
