TECHNICAL SPECIFICATIONS**MULTI-PLATFORM PROCESSING**

- Android & iOS phones and tablets processed in a single batch
- iOS firmware cached per model, so repeat restores skip the download
- Parallel processing across multiple USB buses, up to 16 concurrent restores

ACTIVATION LOCK & SECURITY CHECKS

- Find My iPhone, Apple MDM and carrier lock detection on iOS
- GSMA blacklist check flags lost or stolen devices
- FRP lock check on Android
- Active eSIM profiles detected on iOS and flagged for removal

HARDWARE DIAGNOSTICS

- 26 functional tests across display, touch, cameras, audio, sensors, battery, charging and connectivity
- Test selection and running order set per batch

BATCH PROCESSING & WORKFLOW

- Physical port mapping fixes each USB port to a position on the on-screen grid
- Battery threshold safeguard advises on or blocks low-charge devices
- Interrupted connections recovered automatically, genuine cable and port faults flagged

REPORTING & AUDITING

- Tamper-proof PDF certificate and matching JSON file per device
- Captures vendor, model, serial number, IMEI, OS version, storage capacity and battery condition
- Custom fields for operator ID, customer name, job number and cosmetic grading

INTEGRATION & DEPLOYMENT

- Runs standalone or connected to Command Center for multi-station management
- Reports sync to the Ziperase Customer Portal or a third-party ERP

CERTIFICATION & COMPLIANCE

- ADISA Product Claims Test certified
- Erasure to NIST SP 800-88 R2 and IEEE 2883:2022 standards
