TECHNICAL SPECIFICATIONS**REPORTING & AUDITING**

- Detailed reports in PDF, CSV, & JSON formats
- Customizable fields for asset tracking & integration with existing workflows
- Quick search function & automatic report retrieval

DEPLOYMENT OPTIONS

- Loose Drives & SAN (Array) - efficient, accurate, & streamlined drive verification
- Networked solution (Command Center)- manage & verify hundreds of drives simultaneously from a central location
- Standalone Bootable USB media (USB Erase) - verify anywhere, anytime

VERIFICATION

- Configurable from 1% to 100% drive sampling - choose your method:
 - All Zeros: Confirms the drive contains only zeros.
 - All Ones: Confirms the drive contains only ones.
 - Autoverify: Analyzes the first sector & verifies all remaining sectors match. Ideal for unknown prior erasure methods.

EASE OF USE

- Single, easy-to-install download with built-in Linux OS
- Designed for automation with minimal user interaction
- Acts as boot server, report collation server, & licensing server
- PXE boot for fast network extension & client computer addition

LICENSING & COMPATIBILITY

- Compatible with drives erased by other software, with options to handle boot certificates & fingerprints
- Flexible licensing plans – verify drives independently of erasure for cost-effective compliance & audits

COMPLIANCE

- Supports compliance with GDPR, HMG Infosec Standard 5, HIPAA, CCPA etc.
